OBJECTIVE

Looking for a challenging startup-like environment that provides me with a good opportunity for learning and advancements.

MD. ALAMIN MOLLA

PROJECTS

- Real Estate Company Website Based on Django
- WordCount Website Based on Django
- Blogging Website Based on Django
- Temperature & Humidity Reader Website Based on IOT

I love to work with python that's why I love Web Development using Django. I don't have any experience yet but I worked on several web development projects those are based on Django Web development framework. So I'm pretty much confident about my skills. Therefore, I'm ready to accept any challenge and any environment to work with.
